

MOMENTUM SALES VOLUMES

Momentum Sale volumes are set based on the level of buying on the previous day's Momentum Sale as per the following conditions:

- If the previous days Momentum Sale is 100% sold out, the next days' EDGE-X volume is increased up to 10% of the previous days' volume
- If the previous days Momentum Sale is not sold out, the next days' EDGE-X volume will be the same as the previous day.

EDGE196™ will adjust the volume based on historic Momentum Sale data to ensure nominal demand is maintained. The first Momentum Sale's volume is set to 5,000 EDGE-X.

Momentum Sale Day	EDGE-X Volume	Sales Level
1	100,000	100%
2	110,000	85%
3	110,000	100%
4	121,000	90%
5	121,000	100%
