

EDGE196™ has a number of distinct advantages over traditional VC firms.

EDGE196 brings innovative and transformative solutions to its portfolio companies such as Blockchain technology, global innovation and the fostering of strong mentorships and advisory relationships.

EDGE196™ digital assets are built on multiple blockchains, creating a trustless system which encourages participation by investors, reduces costs and provides a level of security and accountability unique in the VC world.

- **LOW-COST STRUCTURE**

Public blockchain networks, such as Ethereum, are sustained by independent servers, which ensures transaction costs are marginal compared to traditional finance sector models.

- **INCREASED SECURITY**

Cryptographic security is built into the foundation of blockchain technology.

- **ENHANCED AUTOMATION**

Sophisticated smart contracts automate processes and reduce human error in transactions.

- **REGULATORY COMPLIANCE**

Blockchains are immutable, public and permanent, thus support auditability. EDGE196™ platform also includes strong 'Know Your Customer' KYC procedures.
